Active Secret Clearance – Granted March 2026

EDUCATION

Rochester Institute of Technology
Bachelor of Science in Cybersecurity

Rochester, NY
Expected: Dec 2026

CERTIFICATIONS

CompTIA Security+

July 2026

EXPERIENCE

Lockheed Martin: *Cyber Systems Engineer Intern*

Jun 2026 – Present

- Integrated NIST 800-53 security controls into system designs, authoring System Security Plans (SSPs) and Plans of Action & Milestones (POA&Ms) to obtain Authorization to Operate (ATO) for multiple key stakeholders.
- Led end-to-end Risk Management Framework (RMF) efforts to sustain DoD compliance, performing SCAP scans, maintaining STIG mappings, and automating evidence collection to accelerate ATO approvals.
- Collaborated with stakeholders to develop Verification & Evaluation (V&E) plans, aligning security control implementation strategies to future ATO requirements.

PROJECTS

Risk-Based Authentication Literature Review: *Contributing Author*

May 2026

- Co-authored a systematic literature review on Risk-Based Authentication (RBA), evaluating machine-learning risk scoring, deployment challenges, and security-usability-privacy trade-offs.

Multi-Platform Cloud Infrastructure: *Cloud & Virtualization Engineer*

Apr 2026

- Engineered a cloud and virtualization infrastructure suite across four lab environments, applying IaC, high availability, and Zero Trust principles.
- Built scalable Azure architectures with ARM templates for load-balanced web tiers with health-based failover, securing access via Azure Bastion and Key Vault.

Segmented Enterprise Network: *Network & Systems Architect*

Dec 2025

- Architected a segmented two-VLAN Proxmox network integrating Windows Server 2022 (AD/DNS/DHCP) with RHEL 10 systems, hardened to CIS Benchmarks with Wazuh-based centralized monitoring.

Healthcare DR/BCP Technology Assessment: *Contributing Author*

Dec 2025

- Co-authored a technology risk assessment on Identity, AI, Quantum Computing, and Cloud adoption for disaster recovery and business continuity; led the Cloud Computing analysis within a HIPAA/HITECH regulatory context.

Virtual Domain & Network Infrastructure: *Server Administrator*

Dec 2024

- Established and managed core Windows Server infrastructure (Active Directory, DHCP, DNS, pfSense) to support Windows and Linux clients, including user, OU, and GPO management.
- Deployed a secure Apache web server with SSL/TLS encryption and configured a vsftpd server, evaluating file-sharing protocols including rsync, FTP, Samba, and NFS.

EXTRA-CURRICULAR ACTIVITIES

RITSEC (Cybersecurity Club): *Active Member*

Aug 2023 – Present

- Conducted mentorship-guided forensic analysis with Autopsy and applied the MITRE ATT&CK framework in adversarial emulation exercises.
- Contributed to building RIT's internal competitions, developing logging infrastructure and designing King of the Hill (KoTH) style challenges.

TECHNICAL SKILLS

Windows, Windows Server, Linux (RHEL/Debian), Active Directory, Group Policy, pfSense, Wazuh, Nmap, Metasploit, Burp Suite, Wireshark, Autopsy, Python, PowerShell, Bash, Git
