EDUCATION & CERTIFICATIONS

Rochester Institute of Technology: *B.S. in Cybersecurity*
CompTIA Security+

Expected: Dec 2026
Jul 2026

EXPERIENCE

Lockheed Martin: *Cyber Systems Engineer Intern*

Jun 2026 – Present

- Integrated NIST 800-53 controls into 3 system designs, authoring SSPs and POA&Ms to obtain Authorization to Operate (ATO) for multiple key stakeholders.
- Boosted team productivity 30% via automated ATO evidence collection, sustaining DoD compliance through end-to-end RMF lifecycle management, quarterly SCAP scans, and STIG mapping maintenance.
- Developed Verification & Evaluation (V&E) plans with stakeholders, aligning control implementation strategies to future ATO requirements.

PROJECTS

Risk-Based Authentication Literature Review: *Contributing Author*

May 2026

- Co-authored a systematic review of 35 sources on Risk-Based Authentication, analyzing ML-based risk scoring and security-usability-privacy trade-offs; found only 42.31% of audited sites supported MFA.

Multi-Platform Cloud Infrastructure: *Cloud & Virtualization Engineer*

Apr 2026

- Engineered cloud and virtualization infrastructure across 4 lab environments using IaC, high availability, and Zero Trust principles; built Azure ARM-template architectures with load-balanced web tiers, Azure Bastion, and Key Vault.
- Configured Linux KVM/libvirt and 3-node Proxmox VE clusters managing 6–8 VMs with automated lifecycle management and multi-node migrations.

Segmented Enterprise Network: *Network & Systems Architect*

Dec 2025

- Deployed a two-VLAN enterprise network on Proxmox integrating Windows Server 2022 (AD, DNS, DHCP) with RHEL 10 services; hardened 6 hosts against 236 CIS Benchmarks and configured Wazuh for centralized logging and threat detection.

Healthcare DR/BCP Technology Assessment: *Contributing Author*

Dec 2025

- Co-authored a technology risk assessment with a 5-person team for a 5-clinic healthcare network; led the Cloud Computing analysis in a HIPAA/HITECH context, contributing to a 36-month DR/BCP roadmap.

Virtual Domain & Network Infrastructure: *Server Administrator*

Dec 2024

- Managed Windows Server infrastructure (AD, DHCP, DNS, GPO, pfSense) for Windows and Linux clients; deployed an SSL/TLS Apache server and evaluated 4 file-sharing protocols (rsync, FTP, Samba, NFS).

EXTRA-CURRICULAR ACTIVITIES

RITSEC (Cybersecurity Club): *Active Member*

Aug 2023 – Present

- Performed forensic analysis with Autopsy and ran MITRE ATT&CK adversary simulations emulating 10+ real-world tactics.
- Helped build 2 of RIT's internal competitions, developing logging infrastructure and King of the Hill (KoTH) challenges.

University at Buffalo Lockdown: *1st Place – Windows IR Analyst & CTF Lead*

Feb 2025

- Led Windows incident response for 10 compromised systems, analyzing malware with Sysinternals and Wireshark and automating remediation with PowerShell to place 1st of 12 teams.

CORA II: *1st Place – Penetration Testing Analyst*

Oct 2024

- Discovered 8 and exploited 5 critical web vulnerabilities (time-based SQLi, persistent XSS) using Nmap, Burp Suite, and Metasploit to place 1st of 9 teams.

TECHNICAL SKILLS

Windows, Windows Server, Linux (RHEL/Debian), Active Directory, Group Policy, pfSense, Wazuh, Nmap, Metasploit, Burp Suite, Wireshark, Autopsy, Azure, Proxmox VE, KVM/libvirt, Infrastructure as Code (IaC), Python, PowerShell, Bash, Git
